EAST SIDE DUPLEX

This renovation combined two small apartments into a functional duplex home. The new plan for the lower level is an open loft-like living space that includes a kitchen, living room and dining room. On the upper level there are three bedrooms and a new, minimalist stair connection the two levels. The stair is composed of simple wood treads and a delicate steel handrail. A conscious decision was made to limit the palette of materials so the unique beauty of each material would stand out and provide the client with a sumptuous, yet visually understandable, interior space.
